Patients' Data Safety-A Priority for Healthcare Practices

High Tech Innovations, LLC Urges Healthcare Providers to Update their IT Infrastructure for Keeping their Patients' Data Safe

New Jersey – November, 28 2016 – High Tech Innovations, LLC., a leader in HIPAA compliant encrypted email and data backup solutions, shared some startling facts regarding the data security procedures of healthcare practices. The company sources highlighted that most attacks are carried out by hackers who want to acquire medical records due to their extreme value. The information in medical records (name, birthdate, addresses, phone numbers, medical history and social security numbers), can be easily used for identity theft, fraudulent medical billing or acquiring prescriptions to resell on the street. Hackers can use the medical information to accomplish just about anything once acquired. This flaw in IT security is not a series of isolated incidents but an incredibly widespread problem now affecting millions of people across the nation.

Presently, majority of the healthcare providers are using outdated data backup technology which makes the job of hackers even easier. IT security is often a large oversight for healthcare organizations because their objective is to save lives. Unfortunately, lack of internal IT expertise and outdated technology plagues the healthcare industry making it an easy target.

Jeffrey Weiss, President of High Tech Innovations, commented, “The challenge here is that practices are inherently more interested in saving lives, instead of upgrading their IT security. This a great thing for society and we believe that’s exactly what practices should be focused on! The only thing is that IT security must be addressed too. Over the last two decades, we’ve learned exactly what it takes to protect healthcare organizations and we love being a part of the solution to this problem. It’s unfortunate when something like this happens but it brings much needed education to the issues at hand. We consider it our duty to

educate our market and provide healthcare practices with technology tools they need to do their jobs, protect their patients and spend their time focused on saving lives, instead of firewalls. That’s our job!!!”

About High Tech Innovations, LLC.

High Tech Innovations, LLC. provides healthcare practices with easy to manage IT solutions to ensure their patient's data safety at all times. HTI offers its clients HIPAA compliant data backup and disaster recovery solutions, managed IT services, structured cabling, networking, surveillance, network security and digital imaging solutions.
