High Tech Innovations, LLC Offers Next Generation Cybersecurity Solutions

Small and Medium Sized Healthcare Providers Now Experiencing Cyberattacks That Have Taken Down Large Practices

New Jersey— January 2019 – High Tech Innovations, LLC, a leading managed technology services provider (MTSP), is helping small to mid-sized healthcare organizations equip themselves with the necessary cybersecurity protections that every modern practice needs to survive. While practices have started investing in cyber-security systems and defenses, they still have proven vulnerable. Small and medium sized practices face cyberattacks and must take the proper precautions to protect their patients’ data as well as their own information from being compromised.

Cybercrime now outstrips all other organized crime combined. As larger practices are forced to invest in the strength of their IT infrastructure, via policies and penalties, cybercriminals will only have one place to go, small practices.

Jeffrey Weiss, President of High Tech Innovations, LLC added, “The bottom line is that if a small or medium sized healthcare practice is hit with an attack like this, through penalties and damage to practice reputation, it would very likely put them out of business.

Coincidentally, this serious problem is actually relatively simple to remedy.”

Most healthcare providers have already taken a few precautionary measures. They have a backup and disaster recovery solution, firewalls, AV malware solutions and perhaps another component here or there. Yet, hackers thrive on practices that are utilizing obsolete technology to run their practice. If practices want to ensure their compliance with new regulations as well as to ensure that they don’t get hit with massive, unexpected fines, they need remain current with cybersecurity. In other words, they need to be utilizing next generation cybersecurity solutions to remain one step ahead of hackers.

High Tech Innovations, LLC leverages sophisticated next generation cybersecurity solutions that includes, email filters with malware protection, staffed 24x7 security operations centers (SOC), password vaults, quarterly network vulnerability scans, phishing simulators, security awareness training to educate healthcare practices on what emails not to click on, and expanded AV malware protection.

“Minimal protection simply doesn’t cut it, anymore,” commented Weiss. “We have made a significant investment in cybersecurity technology,

educating our team of professionals, and achieving a variety of cybersecurity certifications. This has given us a unique competitive advantage in the marketplace, but more importantly we have the tools and knowledge to provide an unparalleled cybersecurity offering to our clients.”

ABOUT HIGH TECH INNOVATIONS, LLC

High Tech Innovations, LLC. has been providing cutting edge technology to thousands of businesses and healthcare practices in the northeast region since 1997. The company has been working to increase the productivity and profitability of its clients by offering them a range of technical products and services in the field of communications (VoIP), managed IT services, structured cabling, networking, surveillance, network security, digital imaging and backup and disaster recovery. Their certified and experienced technicians and engineers provide technical support and maintenance to keep various businesses running smoothly and compliantly.
